USNV-321G Generation 3 Night Vision Goggles

Model : USNV-321G

Manufacturer : US Night Vision

USNV-321G Generation 3 Night Vision Goggles.

The USNV-321 is the highest quality commercial dual-tube/dual-eye night vision goggle available. It offers a true stereoscopic night vision image.

The USNV-321 is US made, and utilizes the highest quality Generation 3 image tubes. The unique patented design eliminates the need for interpupillary adjustment. The small size and weight of this unit makes it easy to carry.

The USNV-321 features all of the benefits of US made Generation 3 technology, such as automatic brightness and gain control, bright light protection, along with a powerful IR illuminator. The USNV-321 is a highly professional night vision device. Specialized multicoated optics provides extreme clarity in low-light situations. The system ships with a head-mount and a soft carry case.

You can additionally purchase a pair of 3X magnification lenses converting the 321 into a 3X binocular.
